Lesson : 06 (Architecture and Administration - Install Oracle Server- Part II)

Halloo, IT friends all. We cover previous lesson 05 up to step 5. Next step 06 and up to finish.

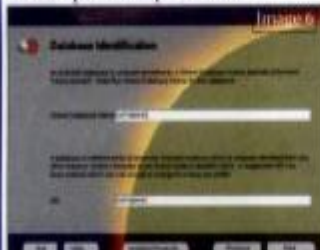

Image 06: Display here very important screen "name of Database" and identity of database. We selected here database name is Databank and remember that always keep it in your mind and click for next screen.

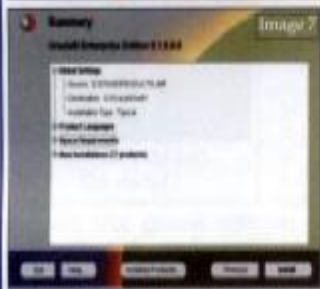

Image 07: Now display data sheet including all information about oracle and click next

Image 08: Click here Ok and go for next. After that display the screen as just now finished oracle server installation successfully.

Second stage : After finish of Oracle installation : (Image 09 , Image 10 & Image 11)

a. Database connectivity. Now we shall check under desktop program menu and we see oracle Home name menu in program Desktop.

b. Now click Oracle SqlPlus under popup menu and display the screen asked for user name and type here Scott and asked for password and type here Tiger. After properly log in Database under SQL/Prompt.

c. Now apply two Oracle command for using oracle database like

screen asked for user name and type here Scott and asked for password and type here Tiger. After properly log in Database under SQL/Prompt.

c. Now apply two Oracle command for using oracle database like

1. SQL> select * from CAT;

Display here Different type of Data Table

2. SQL> select * from emp;

Display here all data of employ table. Dear friend I hope you have done it and get the real feeling of oracle database connectivity.

Third stage : Now, It will be check Oracle Database running mode. It is very important that regular checking external connectivity for database connectivity : (Image 12)

a. Database running under service mode is startup started.

b. Oracle.exe always running mode under active in task manager.

Last of all very important that keeping backup all configuration file like (Image 13)

I. init.ora
II. sqlnet.ora
III.

Tnsnames.ora and
IV. Listener.ora

has two set. If any problem occurred during activity of Oracle Server, quickly get the reference and other help from backup file as including all configuration file.

You are keeping touch with Financial Mirror as result that once upon a time you will become Oracle "Smart User" in future. Thank you.
